

8th and 9th European Conferences on Scientific Diving

2023 and 2024

You are invited to bid to host the 8th and 9th European Conferences on Scientific Diving to be held in 2023 and 2024, respectively

The European Conference on Scientific Diving is a combination of the "Research in Shallow Marine and Fresh Water Systems" series with the "International Symposium on Occupational Scientific Diving" series into a single annual meeting. The intention is to provide a major international forum to highlight the scientific outputs that are being achieved in Europe principally through the use of scientific diving as a research tool. The symposium should attract the European leaders in the field of scientific diving, but must also provide a platform to encourage significant participation from Early Stage Researchers.

We are requesting bids from institutes, universities or other research organisations who would be interested in hosting this meeting in 2023 or 2024. There is no formal structure to submitting a proposal, but in making a bid, the proposers may wish to include information on:

1. Preferred date (this would normally be in the months of March or April).
2. Location for the meeting.
3. The host institute or group
4. A statement of the financial security of the host (the host would be expected to bear the financial risk of running the symposium; the statement should include what the consequences of making a financial loss would be for the host; conversely, there should also be a statement on how an operational surplus would be handled)
5. Approximate number of participants that could be accommodated in the conference location (a number of up to 100-150 participants should be expected).
6. Would you have the capability to provide a hybrid meeting (in person and online) if the effects of CoVid-19 persist?
7. It is acknowledged that it will probably not be possible to give a price for the Symposium. However, it would be expected that pricing would be kept as low as possible to attract good attendance. Some information should be given on a possible pricing strategy.
8. Any intended themes to be incorporated into the conference.
9. Possible invited speakers?
10. The capability for creating a book of abstracts (printed or e-format).
11. Plans for an incorporated poster session(s)
12. The possibility for associated field trips or workshops.
13. Details of accommodations – guide to the range of places available for accommodation with approximate cost bands.
14. Travel guide – how easy is it for people to travel to and from the symposium.
15. Sponsorship potential?
16. Any other details that may be of interest.

Please submit your bids by email to Dr Martin Sayer (martin.sayer@tritoniascientific.co.uk) by **NO LATER than Friday 11TH February 2022**. All bids will be reviewed by a small oversight committee (listed below) chosen to be representative of the general European scientific diving community including past conveners of previous meetings; that committee will dissolve once the locations for the next two meetings have been chosen and hand over responsibility for organising the meetings to the local organisers.

It is hoped to be able to announce the location of the 2023 and 2024 meetings by **25th February 2022**. Please be aware that it is expected that the successful bidders attend the preceding conference and give a brief presentation to that conference about the arrangements for the event the following year. For information, the 7th conference will be held in Roscoff, France, 25th-29th April 2022 (<https://ecsd7.sciencesconf.org/>).

Oversight Committee

Maria Asplund	University of Gothenburg, Sweden
Piotr Balazy	Institute of Oceanology, Polish Academy of Sciences, Poland
Thomas Grab	TU Bergakademie Freiberg, Germany
Jouni Leinikki	Alleco Oy, Finland
Alain Norro	Royal Belgian Institute for Natural Sciences, Belgium
Thomas Pichler	University of Bremen, Germany
Massimo Ponti	Università di Bologna, Italy
Maria Salomidi	Hellenic Centre for Marine Research, Greece
Martin Sayer	Tritonia Scientific, UK

Previous Conferences

1 st	2015	Bremen, Germany
2 nd	2016	Kristineberg, Sweden
3 rd	2017	Madeira, Portugal
4 th	2018	Orkney, UK
5 th	2019	Sopot, Poland
6 th	2021	Freiberg, Germany
7 th	2022	Roscoff, France
